# Discussion

- Keeping track of incidents, policies, training, and other core aspects of daily police work is easier and more productive with customizable and user-friendly records management systems (RMS). These systems also help optimize accountability and transparency while addressing liability concerns. -IACP

# Current Application

MPD Training section is currently using PowerDMS to electronically record all lesson plans. This started January 1, 2019. This includes academy lesson plans.

Ongoing project to provide Department training through PowerDMS.

## Committee Feedback

Minimal discussion from committee on recommendation.

Do you use Power DMS to teach the classes?

- There is potential is use Power DMS for instruction. This was done for the most recent Taser recertification.

Discussion
